

NEW

Make the most of the elementary properties. Keep fit and enjoy every move in the lightness of water.

Unifit

PERAQUA®

PROFESSIONAL WATER PRODUCTS

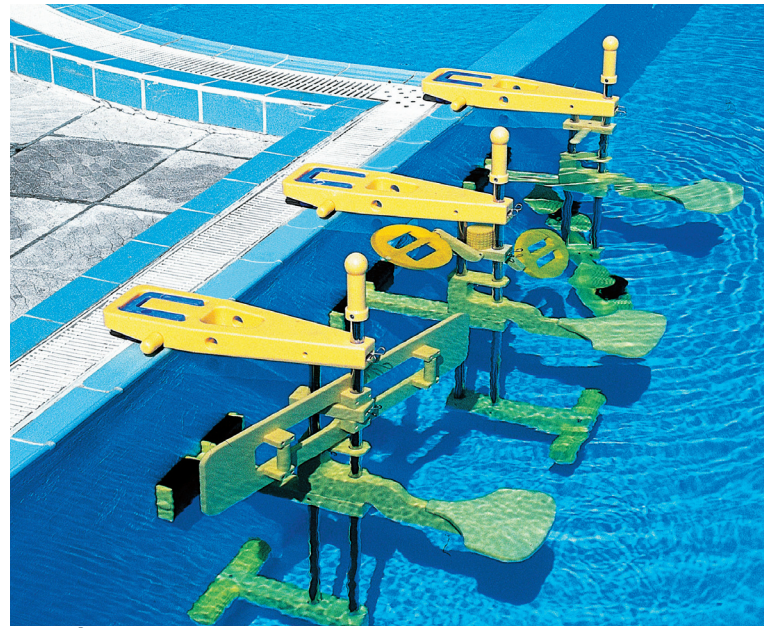

„HAND WHEEL“

„HAND MILL“

„TREADMILL“

UNIFIT® equipment requires a minimum pool depth of 1.5 metres, is easy to install on solid pool walls, and operates seamlessly needing very little maintenance.

Being specially designed for use in water sports programmes, UNIFIT® introduces you to an entirely new range of applications for private as well as public swimming pools and wellness facilities: hotel pools, rehabilitation centres, sports clubs, and many more. In addition to training specific muscles by swimming and simply relaxing in the water, you can now use your pool also for individual training scales and for rehabilitation therapy. UNIFIT® equipment helps you strengthen your muscles, regain muscle tonus, and reduce fat tissue. What is more, your coordination and balance will improve. Even muscle mobility and general body performance can be enhanced almost without effort.
