

Built-in, commercial overflow spas should be standard in all hotels and public areas.

The Martinique overflow spa, with a diameter of 2.5 m, is the most popular overflow spa in our range of commercial spas. This spa is designed for up to 7 people, who will enjoy the benefits of a wide variety of massage systems.

Overflow spas can be used privately, as well as commercially, as they provide full comfort thanks to their continuous water level and ease of installation.
